

# SANYAL RAJ THADATHIL

## Senior Project Manager - AV & Immersive Technology | Digital Signage, Robotics & Smart Systems Integration

DSO - Dubai, UAE | +971 50 676 0708 | sanyalraj.t@gmail.com | linkedin.com/in/sanyalraj | Immediately Available

### PROFESSIONAL SUMMARY

---

Senior Project Manager with 10+ years of UAE experience coordinating end-to-end delivery of AV, Digital Signage, Interactive Kiosk, Robotics, and Immersive Technology projects across retail, government, hospitality, and aviation sectors. Proven track record managing project schedules, budgets, procurement, vendor coordination, and multi-site installations from site survey through testing, commissioning, and handover. Strong technical foundation across AV systems integration, LED/LCD displays, digital signage CMS platforms, IoT/sensor integration, and AI-enabled customer engagement solutions. Skilled at bridging technical teams, clients, and vendors to deliver projects on time, within budget, and to quality and safety standards. Experienced delivering 100+ technology projects for global brands and government entities.

### CORE COMPETENCIES

---

**Project Management:** End-to-end project delivery, scheduling, budgeting, resource allocation, procurement, risk management, milestone tracking, quality and safety compliance

**AV & Immersive Technology:** AV systems integration, LED/LCD video walls, 4K projection mapping, digital signage CMS (BroadSign, BrightSign, Yodeck), interactive kiosks, touchscreens, experiential technology

**Robotics & Smart Systems:** Autonomous robotics deployment, robotics-integrated digital signage, smart technology solutions, sensor-driven interactive environments

**IoT & AI Integration:** IoT and sensor integration, embedded systems, AI and automation integration into customer-facing solutions, analytics-driven engagement platforms

**Stakeholder & Vendor Management:** Client liaison, vendor and subcontractor coordination, technology partner relationships, solution presentations, requirement gathering and scoping

**Technical Documentation:** Technical reports, method statements, project documentation, progress reports, handover documents, site survey and assessment reports

**Site Execution:** Site surveys, technical assessments, installation oversight, testing, commissioning, troubleshooting, post-deployment support, multi-site rollouts

### PROFESSIONAL EXPERIENCE

---

#### Senior Project Manager - AV, Digital Signage & Robotics

*RoboAds General Trading LLC | Dubai, UAE | Nov 2019 - Present*

- Coordinated end-to-end delivery of Digital Signage, AV, Robotics, and Smart Technology projects across the UAE and GCC, from planning through installation, testing, commissioning, and handover.
- Managed project schedules, resource allocation, procurement, and installation timelines across multiple concurrent projects, ensuring on-time delivery.
- Acted as primary liaison between clients, vendors, subcontractors, and internal technical teams throughout each project lifecycle.
- Conducted site surveys, technical assessments, and solution planning to translate customer requirements into deployable AV and immersive technology solutions.
- Prepared technical reports, method statements, and client presentations to support project approvals and stakeholder alignment.
- Provided technical support for networking, digital signage CMS platforms, embedded systems, sensors, and IoT integrations, working closely with engineering teams to integrate AI and automation into deployed solutions.
- Monitored project risks, tracked milestones, and ensured compliance with quality and safety standards.
- Successfully coordinated and delivered 100+ technology projects across retail, government, hospitality, and aviation sectors, including autonomous robotics and interactive digital signage in high-traffic public environments.
- Supported technology deployments for major government and public entities including Dubai Police, UAE and Qatar Ministry of Interior, Dubai Airports, Sharjah Airport, Madrid Airport, Barcelona Airport, Al Ain Mall, and the Museum of the Future, Dubai, across UAE, Saudi Arabia, and Qatar.
- Featured live on Al Arabiya and Abu Dhabi TV for showcasing an original AI-powered real-time hologram avatar innovation, representing the company in national and regional media coverage.

- Built strong relationships with technology partners and vendors, contributing to proof-of-concept demonstrations and pilot projects that generated new business opportunities.
- Resolved complex technical and operational challenges during implementation, minimizing downtime and delivery risks, while bridging technical expertise with project management from concept to deployment.

### **Project Manager - AV & Interactive Technology**

*Moving Digital Agency | Dubai, UAE | Mar 2017 - Nov 2019*

- Coordinated the planning and execution of digital transformation, interactive technology, and experiential projects for corporate, retail, and government clients.
- Managed project timelines, budgets, resources, and stakeholder communications, collaborating with creative, design, development, and production teams to translate client requirements into technical AV solutions.
- Conducted client meetings, requirement gathering, project scoping, and solution presentations, and oversaw procurement, vendor coordination, and installation scheduling.
- Coordinated the deployment of digital signage, interactive kiosks, touchscreens, LED displays, and experiential technologies across multiple locations, including a large-scale program of 28 custom digital signage and interactive kiosk concepts for a major regional duty-free operator, and delivered customer engagement solutions for global brands including Cartier, Sephora, and NYX, and for TDRA.
- Monitored project progress, managed risks, and ensured compliance with quality standards while preparing technical specifications, progress reports, and handover documents.
- Supported testing, commissioning, troubleshooting, and post-deployment support, facilitating communication between technical teams, suppliers, and clients to ensure seamless execution.
- Successfully delivered multiple digital experience projects for retail, corporate, hospitality, and government sectors, managing simultaneous projects while maintaining high standards of quality and client satisfaction.
- Supported implementation of IoT, sensor-based interactions, and digital engagement platforms, and contributed to experiential campaigns and brand activations for high-profile clients.
- Reduced project delays by proactively identifying risks and coordinating timely resolutions with vendors and technical teams, strengthening client relationships through ongoing technical consultation.
- Assisted in developing scalable deployment processes for multi-site installations and rollouts, playing a key role in delivering immersive customer experiences through integrated technology, content, and design solutions.

### **Shift Duty Manager - Network Operations (Acting)**

*Emirates Telecommunications Corporation (Etisalat) | Abu Dhabi, UAE | Dec 2014 - Mar 2017*

- Directed regional GPON and fiber-optic network operations across Abu Dhabi, managing technical teams responsible for 24/7 monitoring, fault resolution, and infrastructure expansion.
- Promoted to Acting Shift Duty Manager, overseeing controllers and field technician teams across assigned regions while maintaining network uptime above 99.8%.

## **EDUCATION**

---

Bachelor of Engineering - Government Engineering College, Idukki, India (2008 - 2012)

Diploma in Embedded Systems and Robotics - Appin Technologies Pvt. Ltd., Bangalore, India (2012 - 2013)
